Audio Research Corporation 2001 Factory Tour and Show Pics

Upon arriving, we were welcomed by Dave Gordon, U.S Sales Manager at ARC.

Inside the factory an employee is working on a
VT200mkII tube amplifier.

A table full of finished transformers. ARC is one of only a handful of companies to design their own transformers (that's how they get that ultra-wide bandwidth).

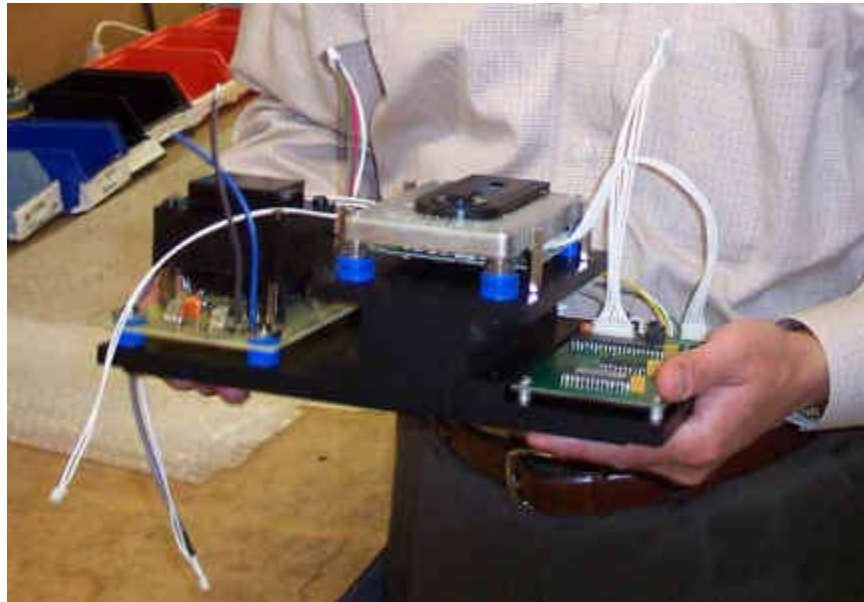

Wima, Infinicap and MIT. ARC uses only the best parts!

The soon to come two-channel version of the 150M.

Dave Gordon shows off the super heavy-duty transport section of the fabulous CD3.

HIGH PERFORMANCE AUDIO & VIDEO

ARC's version of garbage: Discarded circuit boards full of wonderful and expensive parts. Where's a de-soldering iron when you need it?

Dave gets to sit down and talk with Bill Johnson, the man who founded Audio Research and still designs all of the vacuum tube circuits.

A REF 300mkII is mounted to an engine block dolly.

One of the first of ARC's new 150M amplifiers to come off the production line. It uses a new digital switching "class T" output stage.
