A Better Audio & Home Theater Experience

SACD, DVD-Audio, DVD-Video, CD Player & Multichannel Preamplifier

Want even higher performance and flexibility than the Classik Movie provides? Linn's new Unidisk SC is one of the most advanced components the audio/video industry has ever seen. It is the ultimate combination of a universal format disc player and a top-notch multichannel preamplifier. With the Unidisk SC, you can play virtually any disc available, in any format you choose, from pure 2-channel stereo to full multichannel surround. The Unidisk SC will properly decode stereo and multichannel SACD and DVD-Audio recordings as well as DVD movies in Dolby Digital, DTS or Prologic II.

The Unidisk SC uses the same patented "Silver Disk Engine" found in Linn's flagship Unidisk 1.1 rather than the ubiquitous, and inferior, Sony engine. The result is the most natural and analog-like SACD sound money can buy. And, with Linn's latest 24 bit/96KHz digital-to-analog converters and specialized circuitry, DVD-A, DVD-V and standard CDs will sound better than ever before.

If you have been waiting for the right time to upgrade your player from CD-only to "universal," or you want a complete solution for both multichannel music and video, the Unidisk SC is the answer to your prayers. It's available at \$4,995 in black and silver.
