A Better Audio & Home Theater Experience

Music Mountain's AVPP Goes High Definition!

The latest version of the Music Mountain AVPP allows you to receive and watch HDTV broadcasts with any standard antenna (provided you get reasonable reception). All you need is an HDTV –compatible television display, which would include most front projectors, plasmas, HD rear projection sets and some HD direct view televisions.

Even more incredible is that you can record HDTV programs to the hard drive at the touch of a button. The recording is a perfect copy that you can watch later or show to your friends and family. You can even edit the program after it is stored on the hard disk and chop it down to the length you want. Very exciting!
