Introducing the ProAc Response D15

Just added to the Response range of loudspeakers is the new model D15. It looks much like the speaker it replaces, the Response 1.5, but the guts are completely changed. Sonic improvements stem from new drivers and a new crossover. The bass, in particular, is stronger with more extension and a fuller balance. The high frequencies have a sweeter and more open quality while still achieving impressive resolution of fine detail.

Most impressive is the price: \$2995. All of the improvements brought to this new model come at the same affordable price as the previous version making this the best deal ever on a floor standing Response Series ProAc.
